Bachelor's degree Incomplete

USP

Environmental Management

It was actually studying science that I discovered my love for design, so I made a career change

Bachelors' degree Complete

USP

Design

A generalist course that covers visual, service and product design. This is where I've learned that solving human needs is what design is all about

← ← Certified Online Courses

IDFO U

Human-Centered Service Design

Harvard Business School

Entrepreneurship Essentials

Columbia University

Technologies for Data Science: The Internet of Things

Master's degree

Malmö University,

Interaction Design

A programme to address new societal and professional challenges, teaching the practical and theoretical skills necessary for designing meaningful relations between humans & technology

Skills

Even though I learn new things everyday, I feel comfortable dealing with

JavaScript, HTML & CSS. I've also been playing with **Python** for data analysis

On the design side, Figma is my go-to app and Illustrator comes second. Today, I'm eager to dive into electronics so that I can design & build connected objects Beyond any technical expertise, I believe it's our duty as designers to make people's lives easier

Languages

I speak **Portuguese** natively and my **English** is fluent. Also, my family is **Spanish** so I understand & speak a little bit of it

Awards

Information is BeautifulAll the Government
